

GREENNYL[®]

Vinyl variants

Standard

STANDARD BLACK

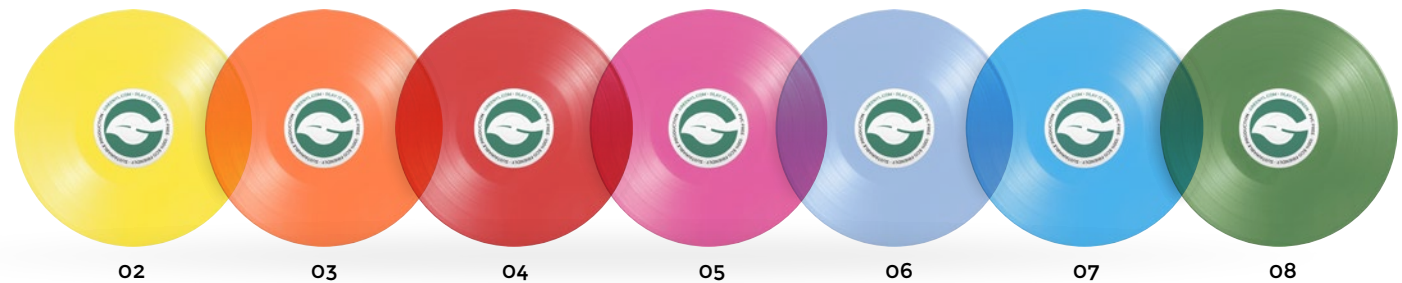

SOLID COLORS

TRANSPARENT

CLOUDY COLORS

Each Cloudy variant has its own overtones, making each vinyl unique. Transparency is set to emphasize the vinyl colorway.

For example:

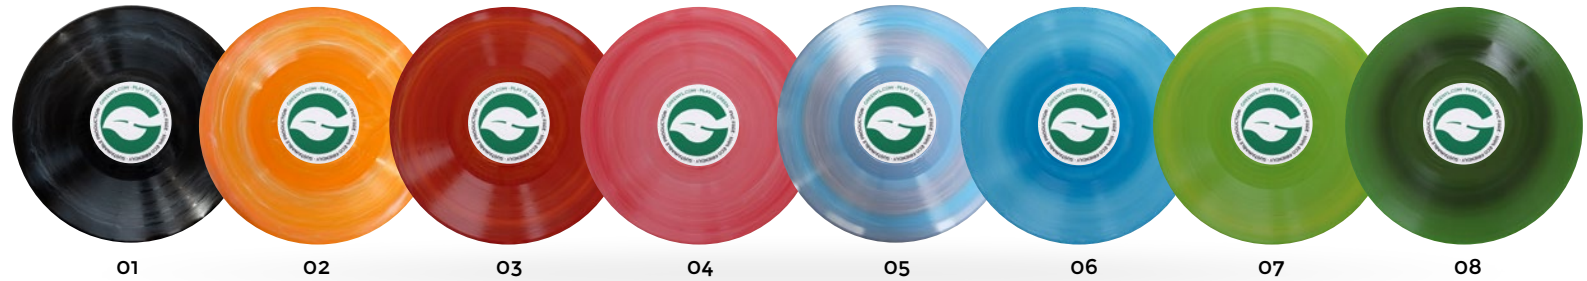

Premium

GOLD

NEBULA

Variations shown are part of the same production batch;
when merged, colours can create different levels of predominance.

For example:

SMOKE

SUPERNOVA

01

02

Vinyl Labels

Etching is a **laser cutting** into a metal surface applied to the stamper to create a design in intaglio on the Vinyl's label area or even on an entire side.

Extended **UV Printing** is a form of digital printing that uses ultraviolet lights to dry ink as it is printed on Vinyls label area. It entirely replaces paper labels and is completely eco-friendly.

Limited UV Printing aims to display the Vinyl background and limits printing to writing. It replaces paper labels and is even more sustainable than the extended variant as it uses less ink and power.
